EDUCATION

York University **2027**
Bachelor of Science (Honours), Computer Science *Toronto, ON*
- **Achievements:** York University Entrance Scholarship, Lassonde Entrance Scholarship, Best UI/UX Award, CS Hub Local Hack Day Hackathon (2023)
- **Coursework:** Database Systems, Database Management Systems, Big Data Systems, Probability, Applied Linear Algebra, Design & Analysis of Algorithms

SKILLS

Data & Business Intelligence: Power BI (Desktop & Service), DAX, Power Query, SQL, Excel (PivotTables, VLOOKUP, VBA), KPI reporting, data validation, reconciliation, data quality analysis
Programming & Data: Python, pandas, Java, TypeScript, React
Platforms & Tools: Microsoft Fabric, SAP, ServiceNow, Genesys Cloud, Jira, ClickUp, Checkbox, Microsoft Entra ID
Business Analysis: Requirements gathering, BRDs, requirements traceability matrices, stakeholder analysis, process documentation, QA/UAT, workflow analysis

WORK EXPERIENCE

Hodgson Group - Orthotics & Prosthetics **Aug 2026 - Present**
Data Analytics Consultant - Riipen FuturePath *Remote, ON*
- Developed a Python/pandas ETL pipeline consolidating 3,000+ treatment records across six ClickUp workflow stages, automating data cleaning and transformation for operational and financial analysis
- Cleaned, standardized, and reconciled a multi-million-dollar treatment and funding dataset, resolving duplicate records, schema inconsistencies, parsing issues, and cross-stage discrepancies to improve reporting reliability
- Validated Python pipeline outputs against Excel, PivotTables, and Power Query, reconciling treatment volumes, funding streams, stage-level records, and aggregate financial totals to ensure analytical accuracy
- Designed 4 prototype Power BI dashboard pages with purpose-built KPI visuals while gathering reporting and workflow requirements from 4+ business stakeholders to inform future analytics and software development.

Hydro One **May 2025 - Sep 2026**
Business/Data Analyst Co-op *Markham, ON*
- Delivered enhancements across an enterprise Power BI suite of 27 operational and performance reports, working directly in 8-9 reports used by contact-centre managers and coaches.
- Authored and modified DAX measures to meet aggregation and filter-context needs, including distinct-count metrics that recomputed across interval, daily, weekly, and monthly views, enabling accurate KPI tracking for business users
- Built and tested reporting changes in Microsoft Fabric, supported multiple QA rounds with business testers, and deployed approved updates through deployment pipelines, delivering error-free reports on schedule
- Investigated reporting discrepancies by tracing DAX logic, filter context, source tables, and semantic-model relationships, and resolved mismatched outputs, restoring data accuracy across dashboards
- Led discovery for a survey-platform migration by inventorying 188 surveys, coordinating stakeholder outreach across 12+ lines of business, and developing business requirements and traceability documentation, creating a clear migration roadmap that reduced planning time
- Facilitated requirements alignment across three organizations for a ServiceNow Service Bridge integration by creating and maintaining traceability matrices in Jira, ensuring the project stayed on schedule and eliminating major requirement gaps
- Automated weekly triage of 14,000-16,000 cybersecurity vulnerability records using Excel VBA, VLOOKUP, and CMDB enrichment, producing structured trackers for ownership assignment and remediation follow-up.

PROJECTS

ApexAuto - Full-Stack Electric Vehicle Marketplace **Jun 2026 - Aug 2026**
- Defined the visual direction and interactive prototype for a four-person e-commerce application, including the design system, page structure, and core purchase flows.
- Built React/TypeScript landing and catalogue pages with search, category and price filtering, sorting, and frontend/backend integration testing.
